

**3/07 RS&H CS Selected to Provide CEI Services for I-295/I-95/SR 9A Interchange Enhancements**

Dale Barnes, President of RS&H CS, is pleased to announce that Florida Department of Transportation (FDOT), District 2, has selected RS&H CS to provide Construction Engineering and Inspection (CEI) Services for the I-295/I-95/SR 9A Interchange Enhancements (North). RS&H CS is the prime consultant and assisted by Civil Services, Inc. and Ghiotto & Associates, Inc.

Most of the work entails new construction of a two-lane bridge fly-over ramp from southbound I-95 to eastbound I-295. In addition, the I-295 bridge over US 17 will be widened on the eastbound side. The major roadway work includes concrete pavement, edge-drain, retaining walls, superpave traffic levels C&D, drainage, utility adjustments, high-mast lighting and signing. FDOT estimates construction will begin in August 2007 and be completed by February 2010.

This is a significant win for RS&H CS because it is the first phase of major improvements that are expected to take more than ten years to fully implement. Also, this will be the only segmental structure under construction in the state of Florida. This win gives RS&H CS a fourth segmental bridge project in the last seven years and solidifies our position as a leader in the segmental bridge industry.
