RS&H CS Adds Deep Foundation Analyses to its Services

ORLANDO, Fla. – Aug. 25, 2009 – RS&H CS, one of the leading providers of Construction Engineering and Inspection (CEI) Services in the Southeast, has added a Deep Foundations Service Group to its portfolio of services.

According to Dale Barnes, PE, President of RS&H CS, the new Service Group will focus on projects that include structures founded on driven precast concrete or steel piles and cast-in-place concrete drilled shafts.

“Our associates have provided foundation analysis on over 200 deep foundation projects throughout Virginia and Florida,” says Barnes. “When we decided to formalize the new Service Group it was a natural progression of our goal to be a full service provider for CEI bridge inspection services.

The Deep Foundations Service Group will offer Pile Driver Analyzer (PDA) Services, Cross Hole Sonic Logging (CSL) Services and Vibration and Sound Monitoring Services, using state-of-the-art equipment.

Mark Hirsch, PE, who has over 19 years of experience with Geotechnical Engineering and CEI services will lead the Deep Foundations Service Group.

###

About RS&H:

With more than 830 employees, RS&H is one of the nation's leading facilities and infrastructure consulting firms whose client-centered program structure provides value-added solutions to clients around the world. With a tradition that began in 1941, RS&H has 31 offices nationwide and six market sector programs: Aerospace and Defense; Aviation; Corporate and Commercial; Education, Health and Science; Public Infrastructure; and Transportation. Construction Engineering Inspection (CEI) services are provided through its wholly owned subsidiary, Reynolds, Smith and Hills, CS Incorporated.
